## [Communication analysis: A stratificational approach](#) **[1]**

Submitted by ron\_moe

Title

Communication analysis: A stratificational approach

Publication Type

Journal Article

Year of Publication

1988

Authors

[Fleming, I](#) [2]

Journal

Dallas: Summer Institute of Linguistics

Keywords

[General](#) [3]

Notes

Ilah Fleming developed a list of basic semantic constructions and constituents from a universal, etic viewpoint. Her purpose was to facilitate emic semantic analysis in previously under-described languages. Although her list is not a list of semantic domains, it is an excellent source for semantic concepts that tend to be expressed by functors.
