## **Communication analysis: A stratificational approach** <sup>[1]</sup>

Submitted by ron\_moe

Title	Communication analysis: A stratificational approach
Publication Type	Journal Article
Year of Publication	1988
Authors	<a href="#">Fleming I</a> <sup>[2]</sup>
Journal	Dallas: Summer Institute of Linguistics
Keywords	<a href="#">General</a> <sup>[3]</sup>
Notes	Ilah Fleming developed a list of basic semantic constructions and constituents from a universal, etic viewpoint. Her purpose was to facilitate emic semantic analysis in previously under-described languages. Although her list is not a list of semantic domains, it is an excellent source for semantic concepts that tend to be expressed by functors.
