[Communication analysis: A stratificational approach](#) [1]

Submitted by ron_moe

Title	Communication analysis: A stratificational approach
Publication Type	Journal Article
Year of Publication	1988
Authors	Fleming, I [2]
Journal	Dallas: Summer Institute of Linguistics
Keywords	General [3]
Notes	Ilah Fleming developed a list of basic semantic constructions and constituents from a universal, etic viewpoint. Her purpose was to facilitate emic semantic analysis in previously under-described languages. Although her list is not a list of semantic domains, it is an excellent source for semantic concepts that tend to be expressed by functors.
